

this percentage for any crop year, may authorize additional outlets, may exempt bleaching stock from inedible kernel determination or obligation and may establish rules and regulations necessary and incidental to the administration of this provision, including the method of determining inedible kernel content and satisfaction of the disposition obligation. The Board for good cause may waive portions of obligations for those handlers not generating inedible material from such sources as blanching or manufacturing.

(b) *Outgoing*. For any crop year the Board may establish, with the approval of the Secretary, such minimum quality and inspection requirements applicable to almonds to be handled or to be processed into manufactured products, as will contribute to orderly marketing or be in the public interest. In such crop year, no handler shall handle or process almonds into manufactured items or products unless they meet the applicable requirements as evidenced by certification acceptable to the Board. The Board may, with the approval of the Secretary, establish different outgoing quality requirements for different markets. The Board, with the approval of the Secretary, may establish rules and regulations necessary and incidental to the administration of this provision.

§ 981.43 Marking or labeling of containers.

The Board may, with the approval of the Secretary, establish regulations to require handlers to mark or label their containers that are used in packaging or handling of bulk almonds. For purposes of this section, *container* means a box, bin, bag, carton, or any other type of receptacle used in the packaging or handling of bulk almonds.

[73 FR 45156, Aug. 4, 2008]

VOLUME REGULATION

§ 981.45 General.

In order to effectuate the declared policy of the act, no handler shall handle almonds except in accordance with the terms and conditions of this part.

§ 981.46 Withholding reserve.

When a reserve percentage has been fixed for any crop year, as hereinafter provided, no handler shall handle almonds except on condition that he comply with the requirements in respect to withholding reserve almonds and the prescribed disposition thereof.

§ 981.47 Method of establishing salable and reserve percentages.

Whenever the Secretary finds, from the recommendations and supporting information supplied by the Board or from any other available information, that to designate the percentages of almonds during any crop year which shall be salable almonds and reserve almonds would tend to effectuate the declared policy of the act, he shall designate such percentages. Except as provided in § 981.50 the salable and reserve percentages shall each be applied to the kernel weight of almonds received by a handler for his own account during the crop year. In establishing such salable and reserve percentages, the Secretary shall give consideration to the ratio of estimated trade demand (domestic plus export, less the handler carryover available to satisfy trade demand plus the desirable handler carryover at the end of the crop year) to the estimated production of marketable almonds (all expressed in terms of kernel weight) or the allocation quantity (marketable production plus almonds diverted to oil or feed when eligible for reserve satisfaction) whichever is applicable; the recommendation submitted to him by the Board; and such other information as he deems appropriate. The total of the salable and reserve percentages established each crop year shall equal 100 percent.

[41 FR 26853, June 30, 1976, as amended at 61 FR 32921, June 26, 1996]

§ 981.48 Increase of salable percentage.

Upon request filed prior to May 15 by the Board or, if the Board should fail to request, by two or more handlers who have handled at least 15 percent of all almonds handled in the preceding crop year, and after findings of fact (based upon a revision of the estimates required under § 981.49 and other pertinent information) that the quantity of
